

Texture

CS 419

Slides by Ali Farhadi

What is a Texture?

Texture

- Easy to recognize, Hard to define

- Spinning

- It's all about

Texture Spectrum

Texture Synthesis

Efros & Leung ICCV99

How to paint this pixel?

Input texture

Ask Neighbors

- What is the conditional probability distribution of p , given it's neighbors?

Input image

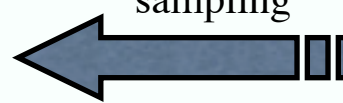

- Don't bother to model the distribution
 - It's already there, in the image

Efros & Leung Algorithm

Synthesizing a pixel

non-parametric
sampling

Input image

Concerns

- Distance metric
- Neighborhood size
- Order to paint

Distance metric

- Normalized sum of squared distances
- Not all the neighbors worth the same
 - Gaussian mask

- Preserve the local structure
- Pick among reasonably similar neighborhoods

Neighborhood size

Varying Window Size

Increasing window size

The Order matters

Failure Cases

Growing garbage

Verbatim copying

Pros and Cons

- Very simple
- Easy to implement
- Promising results

- Very sloooooooooowwwwwww
- Idea:
 - Patches instead of pixels

Patch based

Synthesizing a block

non-parametric
sampling

Input image

- **Observation**
 - neighbouring pixels are highly correlated
- **Idea:**
 - unit of synthesis = block

Random placement
of blocks

Neighboring blocks
constrained by overlap

Minimal error
boundary cut

Minimal error boundary

overlapping blocks

vertical boundary

overlap error

min. error boundary

Dynamic Programming

$$e_{ij} = (B1_{ij}^{ov} - B2_{ij}^{ov})^2$$

$$E_{i,j} = e_{i,j} + \min(E_{i-1,j-1}, E_{i-1,j}, E_{i-1,j+1})$$

Dynamic Programming

$$e_{ij} = (B1_{ij}^{ov} - B2_{ij}^{ov})^2$$

$$E_{i,j} = e_{i,j} + \min(E_{i-1,j-1}, E_{i-1,j}, E_{i-1,j+1})$$

Texture scandals!!

Bush campaign digitally altered TV ad

President Bush's campaign acknowledged Thursday that it had digitally altered a photo that appeared in a national cable television commercial. In the photo, a handful of soldiers were multiplied many times.

This section shows a sampling of the duplication of soldiers.
